PROFESSIONAL SUMMARY

Python Backend Developer experienced in Django and Django REST Framework. Skilled in building server-side logic, REST APIs, PostgreSQL database design, and performance optimization. Strong focus on writing reusable, efficient, and secure code with proper data protection.

EDUCATION

Bachelor of Engineering — Computer Science Engineering

Nov 2021 – May 2025

Asian College of Engineering and Technology

Higher Secondary — Maths & Computer Science

Oct 2019 – Aug 2021

Govt Higher Secondary School, Sreemadurai

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6), HTML5, CSS3
Frontend	React.js, Node Js(Basic), Tailwind CSS
Backend	Django, Django REST Framework (DRF)
Databases	PostgreSQL, MySQL, Django ORM
Authentication	JWT, Token-based Authentication, Permissions
API & Tools	REST API Design, Postman, Git, GitHub, VS Code
Concepts	Server-side Development, Data Protection, Performance Optimization, ETL Basics

PROJECTS

Smart Diet Planning System — Python · Django REST Framework · JWT · PostgreSQL · Gemini API

- Architected a full-stack diet management platform with 12+ REST API endpoints for user profile management, meal logging, and real-time calorie tracking.
- Integrated Google Gemini API to auto-generate personalized, region-specific (Kerala-style) AI diet plans, reducing manual planning effort by ~100% for end users.
- Implemented secure JWT-based authentication and role-based permission controls to protect all API endpoints.
- Designed normalized PostgreSQL schema for users, food logs, and nutrition data; optimized queries via Django ORM.
- Tested and validated all 12+ API endpoints using Postman, ensuring correct status codes, error handling, and data integrity.

AI-Based Resume Generator — Python · Django REST Framework · JWT · Gemini API · PostgreSQL

- Built a full-stack resume generation platform using Django and DRF, exposing 8+ RESTful endpoints to collect and process structured user data (skills, education, experience).
- Integrated Google Gemini API to automatically transform raw user inputs into professionally structured, export-ready resume sections.
- Secured all endpoints with JWT authentication; implemented input validation and serializer-level error handling for robust data flow.
- Designed modular API architecture allowing independent updates to resume sections without affecting other data layers.
- Validated complete API lifecycle (request → processing → response) using Postman test collections.

INTERNSHIP EXPERIENCE

Python Django Intern | Luminar Technolab | Thrissur, Kerala

Oct 2024 – Present

- Built full-stack apps using Django, DRF, React, and Tailwind CSS
- Developed REST APIs, database models, and responsive UI components
- Collaborated using Git in a team-based environment
