PROJECTS

Smart Diet Planning System — Python · Django REST Framework · JWT · PostgreSQL · Gemini API

- Built a full-stack diet management platform with 12+ REST APIs for user profiles, meal logging, and real-time calorie tracking using Django & PostgreSQL.
- Integrated Google Gemini API to generate personalized Kerala-style AI diet plans, eliminating manual planning effort (~100%), with JWT-based authentication and role-based access control.
- Designed normalized database schema and optimized queries via Django ORM; tested all APIs in Postman ensuring proper status codes, error handling, and data integrity.

AI-Based Resume Generator — Python · Django REST Framework · JWT · Gemini API · PostgreSQL

- Built a full-stack resume generation platform using Django & DRF with 8+ REST APIs to process structured user data (skills, education, experience)
- Integrated Google Gemini API to convert raw inputs into professional, export-ready resume sections, secured with JWT authentication, validation, and serializer-level error handling
- Designed modular API architecture for independent section updates; tested full API lifecycle via Postman ensuring reliable request–response flow

INTERNSHIP EXPERIENCE
