PROFILE

BCA graduate building strong full-stack development skills through hands-on projects and continuous learning. Developing web applications using Python, Django, MySQL, HTML, CSS, and JavaScript while strengthening problem-solving and programming abilities. Demonstrates initiative, adaptability, and leadership by taking ownership of projects and exploring new technologies.

EXPERIENCE

Python Django Full-Stack Developer Trainee - Luminar Technolab

March 2026 – Present

- Building web apps using Python, Django, MySQL, HTML, CSS, JavaScript, and Bootstrap.
- Designing responsive front-end interfaces and RESTful APIs for web applications, ensuring smooth performance and compatibility across devices.
- Implementing user authentication, database integration, and backend logic using Django framework.
- Collaborating on project development, debugging issues, and improving application performance during the development process.

SKILLS

Programming Languages	: Python, HTML, CSS, JavaScript, PHP, C, C++, Java
Libraries and Frameworks	: Django, Bootstrap, React
Tools, Version Control, OS	: MySQL, SQLite, WAMP Server, Git, GitHub, Windows, Linux
Soft Skills	: Adaptability, Team Collaboration, Communication Skills
Languages	: English, Malayalam

PROJECTS

SpiceBid–Online Auction Platform

Feb 2026 – Present

- Developed SpiceBid, an online auction platform where users can list products and participate in real-time bidding.
- Implemented features such as user authentication, product listing, bid placement, highest bid tracking, and Razorpay payment integration for auction winners.
- Built role-based functionality for buyers and sellers, allowing sellers to create auctions and users to place bids on active listings.
- Technologies Used: HTML, CSS, JavaScript, Bootstrap, Python, Django, and SQLite.

ELORA – Online Accessory Shop

Jan 2026 – Present

- Developed ELORA, an e-commerce web application for browsing and purchasing fashion accessories.
- Implemented user authentication, category-based product catalog, product detail pages, shopping cart, and order processing.
- Designed a responsive and user-friendly interface to improve the online shopping experience.
- Technologies Used: HTML, CSS, JavaScript, Bootstrap, Python, Django, and SQLite.

Agricare-Online Krishibhavan

Dec 2024 – Feb 2025

- Developed Agricare, a digital platform enabling farmers to access agricultural products, services, insurance schemes, and training programs.
- Implemented secure user authentication and modules for viewing and booking agricultural services online.
- Added features for training enrollment and insurance applications, improving access to government agricultural services.
- Technologies Used: HTML, CSS, JavaScript, Bootstrap, Python Django, and MySQL.

EDUCATION

Bachelor of Computer Applications (BCA) - Mahatma Gandhi University, Kerala

Sept 2022 – Mar 2025

- Coursework: C, C++, Java, PHP, HTML, CSS, Database Management Systems (DBMS), Linux, Computer Architecture, Data Structures, Algorithms, Cloud Computing
